Inspections [plant services] Metal Fabrication [A-36 carbon steel] [crane service]
Design-build [specialty construction] Rigging [design and engineering] general contractor [plant cleanup] [steel fabrication]
Design & Engineering [plant cleanup] [steel fabrication] Field Erection Services
Steel fabrication [services] [chutes and ductwork] Demolition and Dismantlement
Construction Plant Shutdowns Concrete Construction
Material Handling Systems [holding tanks] [restoration] [material handling equipment] [equipment installation]
concrete ductwork [specialty construction] Millwright

Design & Engineering

With over 90 years of experience our registered in-house engineers and drafting team offers practical design ideas that can improve the productivity of your facility.

Metal Fabrication

Hoffmann's 70,000 sq. ft. job shop facility specializes in custom metal products. Our certified welders specialize in carbon steel, stainless steel and aluminum heavy fabrication.

Material Handling Systems

A division of Hoffmann Inc., Wolf Material Handling Systems has over 30 years experience designing industrial bulk material handling systems and equipment for various industries.

Millwright

Machinery and industrial maintenance installations.

Inspections

Hoffmann's design team conducts complete structural inspections of concrete or steel structures, including interiors, perimeters, foundations, roof, walls, and openings.

Demolition and Dismantlement

Interior demolition and equipment dismantlement.

Rigging

Equipment installation, relocation or dismantlement.

Field Erection Services

Final assembly and installation throughout the continental U.S.

Plant Shutdowns

We understand your priority to meet schedules. Hoffmann provides skilled personnel and equipment for projects ranging from routine maintenance within an "on line" facility to 24 hour, 7 day a week plant shutdown.

Concrete Construction

Concrete pedestals, bases, containments, foundations, and floors, plus repairs of cracks, expansion joints, and spalls.
